

Application Compatibility and Testing

Hands On

Event Viewer, Process Monitor (ProcMon), and Dependency Walker are valuable tools for troubleshooting a variety of issues, including application failures, system errors, and dependency problems.

Event Viewer: Logs system events, including errors, warnings, and information messages

Process Monitor (ProcMon): Process Monitor is an advanced monitoring tool for Windows that shows real-time file system, Registry, and process/thread activity.

Its uniquely powerful features will make Process Monitor a core utility in your system troubleshooting and malware hunting toolkit.
